

## **Respirator Medical Evaluation (OSHA) and Fit Testing Process**

The respirator medical clearance process performed by *WORKFIRST* consists of the following components:

- Review of completed OSHA respirator questionnaire by a qualified health care provider. If indicated by the responses on the OSHA respirator questionnaire, the following may be completed:
- Vital signs
- Medical history
- Physical examination
- Pulmonary function testing (spirometry)
- Chest x-ray

The respirator fit test focuses on the following:

- Inspection of respirator/assessment/donning respirator
- User seal checks
- Bitrex qualitative fit-testing
- Cleaning/maintenance and storage of respirator
